SUMMARY

Full Stack Developer focused on building responsive, user-friendly web applications with modern web technologies. Passionate about creating scalable products, exploring AI integrations, and growing through real-world development.

PROJECTS

Voyara — AI Travel Planner (March 2026 - April 2026) [Live Demo](#)

Tech Stack: React, React Router, React Query, Node.js, Express.js, OpenRouter, OpenAI SDK, Axios

- Built an AI-based travel planner that generates itineraries using OpenRouter and the OpenAI SDK.
- Used React Query to control API calls and cache results so it doesn't fetch unnecessarily.
- Worked on improving the UX by avoiding flicker, keeping data on navigation, and handling loading states properly.

WorkAsana — Task Manager (Dec 2025 - Jan 2026) [Live Demo](#)

Tech Stack: React, Context API, Node.js, Express.js, MongoDB, JWT Auth, Chart.js

- Built a MERN task management app with JWT authentication, task creation, and filtering.
- Learned protected routing, handling complex forms (teams, owners, tags), URL-based filtering, and generating reports with Chart.js visualisations and implementation of component based architecture.
- Improved task tracking with grouped views (Team/Project), quick filters, and clear progress insights.

Anvaya — CRM (May 2025 – Oct 2025) [Live Demo](#)

Tech Stack: React, Context API, Node.js, Express.js, MongoDB, Chart.js

- Built a responsive MERN application to manage leads and sales agents with filtering, comments, agent mapping, and auto-refresh data flows using React, Context API, and custom hooks.
- Learned how to design multi-page workflows, handle relational data, and manage state across complex UI screens, Url based filtering and explored data aggregation and chart integration with Chart.js.
- Achieved a smoother lead management experience with easier navigation and updates, and implemented visualisations that provide clearer insights for users.

DripDistrict — E-Commerce (Jan 2025 – April 2025) [Live Demo](#)

Tech Stack: React, Node.js, Express.js, MongoDB, REST APIs, Context API

- Developed React front-end, Node.js/Express API, MongoDB Database. Implemented Context API for state management and integrated RESTful APIs.
- Learned how to structure full-stack features across React, Express, and MongoDB. Explored routing, dynamic rendering, handling multiple product collections and UI State updates.
- Achieved a smoother shopping flow, clearer product organisation, easier navigation, and faster product discovery for an overall better user experience.

Experience

Frontend Developer Intern — Maxgen Technologies (Dec 2022 – April 2023)

- Developed reusable and responsive UI components using React.js
- Integrated APIs and handled dynamic data rendering
- Managed global state using Context API
- Designed UI using Bootstrap for consistent styling
- Followed component-based architecture for maintainable code

SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS3, TypeScript, Redux, Chart.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Python, Flask

Database: MongoDB

AI / Integrations: OpenAI SDK, OpenRouter, AI-powered API integration, Prompt structuring

Tools/Others: Git, GitHub, Postman, NPM, VS Code, Google Antigravity

EDUCATION

Master of Computer Applications

MIT-WPU, Pune (2023–2025)

Bachelor of Computer Applications

MS University, Vadodara (2020–2023)
